

"HELPING BEEKEEPERS KEEP BEES"

Monthly Newsletter Issue: 230 June 2024

Upcoming Events and Notices

This Club Day: No Club Day in June

Next Club Day: 6th July

Whareora Hall 10.00am

What to bring:

- Your Membership card to show at the door
- Cash for the produce table, produce for the produce table
- Library books you have borrowed
- Bee suit (Club has some for members to use also)

Directions: From SH1, turn off to *Kensington*. Turn left onto *Mill Road*, then right at *Whareora Road*. Keep on this road until it joins *Pataua North Road* and continue for a few more minutes.

The hall is on the right. Please **do not** park on the road, use the paddock adjacent to the Hall when the car park is full.

No June Club Day

Thank you to those who turned up to the May Club Day for our AGM. Unfortunately, we didn't have the required quorum (40 members). We had 26 attendees.

The committee decided that because of the public holiday associated with the June club day we will cancel that meeting and make the July club day our AGM. We will need a better turnout for that so please keep it in mind.

No June club day. See you all on July 6th.

The Beekeepers Conference 2024 Whanganui Racecourse 11th - 13th August 2024

Presented by SNI Beekeeping Group Inc on behalf of the SNI Education Trust

An Overseas Keynote Speaker will be attending to discuss varroa, treatments and breeding tolerant bees.

Programme:

- Sunday: Hobbyist day Varroa and treatment options.
 Resistance is coming through misuse of treatments, so are you prepared to use organics?
- Monday: From 1 hive to 600 hives requiring no treatments.
- Tuesday: Where to from here? Can we do this?

Accommodation: (A guide is being prepared for those attending).

Motels and Hotels are nearby. On site at the Racecourse there is space for self-contained campervans and motorhomes, at no cost.

All beekeepers are welcome to attend. If you are not a member of either SNI, NZBees or ApiNZ, then join one of these groups and only pay \$100 per day (no GST).

Contact: <u>beecnference2024@gmail.com</u> or the conference secretary Frank Lindsay <u>Lindsays.apiaries@gmail.com</u>

A sour taste for beekeepers

Beekeepers are crumbling under the weight of diseased hives, depressed honey prices and a lack of industry investment in marketing and research.

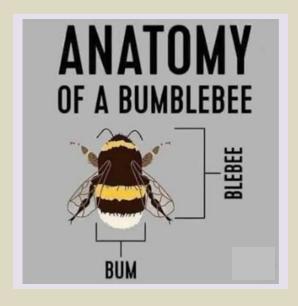

The recently released 2023 New Zealand Colony Loss Survey, by Manaaki Whenua Landcare Research, has found beekeepers have the lowest well-being scores of any primary industry role.

Listen to the interview <u>here</u>

Honey bees brought to New Zealand

Mary Bumby, the sister of a Methodist missionary, was probably the person who introduced honey bees to New Zealand. She brought two hives ashore when she landed at Mangungu Mission Station in Hokianga in March 1839.

Honey Bee Research Symposium

The day before the ApiNZ Industry Summit, scientists will gather in Hamilton to present recent research in the field of apiculture. All are welcome to attend to hear some of the scientific challenges facing the industry, and understand how research in New Zealand addresses these issues.

Monday 17 June, 9am - 5pm Plant and Food Research Ruakura Campus, Hamilton

Places are limited so REGISTER HERE NOW

2023 NZ Colony Loss Survey

Dear Whangarei Bee Club,

You are amongst the 3,457 beekeepers who completed the 2023 NZ Colony Loss Survey. Thank you for contributing to bee science!

Results have been available for the last few weeks. For example, they have been reported in the New Zealand Bee Keeper journal, The Apiarist's Advocate, and on RNZ. But I am also sharing the results directly in case you haven't seen them yet.

As you may know, over-winter losses increased every year between 2015 and 2022. Loss rates fell slightly from 13.5% over winter 2022 to 12.7% over winter 2023. On a national scale, this amounts to about 75,200 colonies lost over winter. As in past years, the main driver of losses was suspected varroa, which was responsible for about half of all over-winter losses.

For the first time, the surveys also recorded autumn losses. The overall loss rate over autumn 2023 was 16.8%. The 2023 survey also included wellbeing measures and losses attributed to Cyclone Gabrielle.

A <u>2-page summary infographic</u> of these and other findings is available.

The full report is available on the <u>Biosecurity New Zealand website</u>. And all of the figures – including some not included in the report – are available on the <u>Manaaki Whenua Landcare</u> Research website.
